

Rubab Ali

Jacobabad, Sindh — rubabaliqureshi@gmail.com — +92 333 7331062

Objective

Cybersecurity student seeking an internship to apply skills in cryptography, network security, and ethical hacking. Eager to gain hands-on experience and contribute to real-world solutions.

Education

B.S. in Cyber Security, Ghulam Ishaq Khan Institute (GIKI), Pakistan

Expected Graduation: Sept 2027

FSc, IBA Community College, Jacobabad — AKUEB Karachi

Skills

Languages/Tools: C++, Python, JavaScript, HTML/CSS, React.js, Node.js, Linux, Postgres, SPSS, MS Office, Word

Design: Figma, Canva, Adobe Photoshop

Soft Skills: Networking, Strong Communication, Leadership, Time Management

Projects

Secure LoRa-Based Industrial IoT (Feb 2025–Present)

Designed a secure LoRa communication system for industrial IoT. Integrated AES encryption and dynamic key management. Implemented real-time anomaly detection to safeguard telemetry.

Cyber-EDU: Honeypots Deployment (Sept 2024–Jan 2025)

Deployed honeypots in a sandboxed environment. Used Elastic Stack for real-time monitoring and log analysis. Analyzed attacker behavior to improve threat detection.

AI-Based Malicious URL and Phishing Link Detection (Apr 2025)

Built a full-stack phishing detector using ML. Developed a React UI and Flask backend. Integrated Oracle SQL for tracking results.

CEH Cloud Security Labs (AWS S3 & Privilege Escalation) (Mar 2025)

Completed labs on AWS penetration testing. Exploited misconfigured S3 buckets and simulated IAM privilege escalation attacks.

AI Crime Forecasting Model

Trained ML models to predict crime trends and aid law enforcement with proactive planning.

2D Pokémon Game in C++

Built a 2D game using object-oriented programming for modularity and scalability.

Seed Lab: Public Key Infrastructure (PKI)

Set up and tested PKI to secure communication using asymmetric encryption.

Experience

Cybersecurity Intern, Nexus

Performed threat detection, vulnerability assessments, and implemented security protocols.

Network Technician (1 Year)

Managed and secured network infrastructure. Resolved hardware and connectivity issues.

Leadership & Societies

NETRONIX-GIKI (2023–Now): Organized events, hackathons, and campus network activities.

AIAA GIKI (2023–24): Led national drone competition; RC plane design and flight.

CBS GIKI (2023–Now): Organized TEDx event logistics.

Team Foxtrot – UAS Winner (2023–24): Built UAVs; focused on design, SDES, and automation.
